Pulchowk Campus

-The Kurukshetra(Not that literally)

This talk is for those

Who are bound to take part in this Kurukshetra.

Who are in dilemma what is happening here?

Who just wants to explore?

Kaurava Army

Large number of negative forces.

Kaurava Army

Politics

Lack of infrastructure
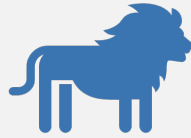

Improper lab management

Tedious Exam Process

Insufficient Syllabus

Unexpected Examination result

Lack of serious assessment of Projects …

Pandava Army

These are the warriors to be used.

Disclaimer: Beware of exceptions.

Faith towards Syllabus

Is Syllabus really bad? Or the real culprit is somewhere else.

Syllabus, a static document, may get changed but what we lack is dynamism.

Execution of syllabus, proper follow guidelines of the syllabus, proper exam methods. (Some ray of hope)

But doesn't mean the syllabus is superb.

Tip: Grab the best book related to the syllabus and feel the magic.

Senior-Junior Relationship

Anti-ragging tendency in the campus.

Workshops, Programs like this.

Help on related projects.

Will fulfill your missing semester.

Tip:- Please don't ever hesitate to consult to your senior.

Friend Circle

A circle has infinite sides.

If someone is Lion in this college, the other one is Whale.

Sports, Art, Music, Study, EC activities.

Group your friends with similar skill, form a club and conduct programs.

Tip:- Make good friends, you will be benefitted.

Workshops and seminars

Feature of Pulchowk Campus

Large number of technological workshops and fellowships

Take workshops in first two years, give workshops in later years.

Tip:- It is not difficult to attend workshops on first year. You can attend as much as possible but please take the review of seniors and choose accordingly.

Internship and Job Opportunity

The Alumni culture of Pulchowk Campus is deep.

We will be the first choice of startups of Pulchowk Campus.

Grab the opportunity, maintain good relationship.

You will see the fusion of Corporate World and Educational World in Pulchowk Campus.

Krishna Consciousness or Meta-Consciousness

Am I exploring anything or Am I being restless?

They are so good in Computer Science; will I ever catch them?

Am I trying to escape from my problems?

What is Passion? Is passion innate?

Does this concern matter?

Programming Languages

Don't explore programming languages restlessly.

Conquer the basics of PROGRAMMING.

Language is just a tool.

Learn about paradigms, techniques, Data Structure and Algorithms.

Marks is Energy

It matters most of the time.

Be serious regarding semester exam.

Almost attempt all the questions during examination.

Try to secure more marks in easy and mathematical subjects.

Time Management

1/3rd of the semester, involve in extracurricular activities.

1/3rd of the semester, grab the classic books of course and study it(At least of the most important subject).

1/3rd of the semester, study for the examination.

Ceasefire
